Keywords Studios hiring team, Tokyo

October 2026

Application: Game Designer, Japan & Global Game Development

Dear Keywords Studios team,

My name is Sabri Mohamadi. I am a Game Designer and Producer based in Tokyo, and I teach **Game Design and Level Design** at Ynov Campus as a Visiting Lecturer. I am writing to apply for the Game Designer position in your Japan & Global Game Development team.

Every week I ask my students the same question about a mechanic they love: why is it fun? I would like to spend my days answering it on real projects, with a team that works between Japan and the rest of the world.

I trained in game programming and design (Master's-level degree, Ynov Campus), and I prototype in **Unity (C#) and Unreal (Blueprints)**. I designed and produced NaJiKi, a horror game that won funding support on French streamer Maghla's show, designed the puzzles of MyHome?, an escape game in Unreal, and worked as Technical Game Designer on game jam projects.

I also bring a production view of design. From 2023 to 2025 I was Global Associate Producer on Little Nightmares at Bandai Namco Entertainment Europe, where I helped ship Little Nightmares III, Little Nightmares VR: Altered Echoes and the mobile port, working every day with external studios on milestones and scope. I sat on the accessibility task force and wrote the team's must-have accessibility document, so I design with accessibility in mind from the first prototype.

English is my working language and French my native language. I understand most spoken Japanese, hold everyday conversations with ease, and take classes in reading and writing. I live in Tokyo on a working holiday visa, so I am already authorised to work in Japan and can start right away. My portfolio is at **sabri-mohamadi.fr**. Thank you for your time and consideration.

Kind regards,

Sabri Mohamadi
