Keywords Studios hiring team, Tokyo — October 2026

Application: Game Designer, Japan & Global Game Development

I am applying for the Game Designer position in your Japan & Global Game Development team. The role asks for a designer who can turn a creative direction into mechanics, levels and systems, prototype quickly, and work with teams in Japan and abroad. I live in Tokyo on a working holiday visa, so I am already authorised to work in Japan and can start right away.

I trained in game programming and design (Master's-level degree, Ynov Campus) and I teach **Game Design and Level Design** at Ynov Campus as a Visiting Lecturer, from first-year Bachelor's to Master's students. I prototype in **Unity (C#) and Unreal (Blueprints)**: I designed and produced NaJiKi, a horror game that won funding support on French streamer Maghla's show, designed the puzzles of MyHome?, an escape game in Unreal, and worked as Technical Game Designer on game jam projects.

I also bring a production view of design. As Global Associate Producer on Little Nightmares at Bandai Namco Entertainment Europe, I helped ship Little Nightmares III, Little Nightmares VR: Altered Echoes and the mobile port, working every day with external studios on milestones and scope. I sat on the accessibility task force and wrote the team's must-have accessibility document, so I design with accessibility in mind from the first prototype.

English is my working language and French my native language. I understand most spoken Japanese and hold everyday conversations with ease, and I am taking classes in reading and writing, which I am committed to improving.

My portfolio is at **sabri-mohamadi.fr**. I would be glad to show my prototypes and talk about how I can contribute to your projects.

Kind regards,

Sabri Mohamadi
