Team ASOBI hiring team, Sony Interactive Entertainment, Tokyo — October 2026

Application: Game Designer, Team ASOBI

Explaining why something is fun is harder than making it fun. I learned that teaching Game Design and Level Design to students, and it is the part of design I enjoy most. It is also what draws me to Team ASOBI, where ideas are shared through sketches and prototypes, with a clear reason behind every mechanic.

I trained in game programming and design (Master's-level degree, Ynov Campus), and as a Visiting Lecturer I teach students from first-year Bachelor's to Master's level to break down how a mechanic works and how a level teaches it to the player.

I prototype my own ideas in Unity and Unreal. I designed and produced **NaJiKi**, a horror game that won funding support on French streamer Maghla's show, designed the puzzles of MyHome?, an escape game in Unreal, and worked as Technical Game Designer on game jam projects.

Before going freelance, I was Global Associate Producer on Little Nightmares at Bandai Namco Entertainment Europe, where I helped ship Little Nightmares III and **Little Nightmares VR: Altered Echoes**. I sat on the accessibility task force and wrote the team's must-have accessibility document. Working on a VR game showed me how much comfort, readability and onboarding shape the fun.

I live in Tokyo and can start right away. My Japanese is conversational, at around intermediate level, and I am taking classes in reading and writing; my working language is English. I am happy to take a practical test. My portfolio is at **sabri-mohamadi.fr**.

Kind regards,

Sabri Mohamadi
