Application: Adjunct Faculty Pool, Undergraduate (Game Design and Production)

Every week I teach game design and production to students in France, remotely from Tokyo. I would like to teach here in person, and propose courses in **game design and game production** for your undergraduate adjunct pool.

I teach Producing, Game Design and Level Design at Ynov Campus in France as a Visiting Lecturer, from first-year Bachelor's to Master's students. I hold a Master's-level degree (RNCP level 7) in Game Programming and Design.

My teaching draws on industry practice. As Global Associate Producer on Little Nightmares at Bandai Namco Entertainment Europe, I helped ship Little Nightmares III, Little Nightmares VR: Altered Echoes and the mobile port, working with external studios across Europe and with colleagues in Japan. I sat on the accessibility task force and wrote the team's must-have accessibility document. I also coached the project leads of six student game projects at the Nightmare Games incubator.

I could teach an introduction to game design, a game production course built around milestones, scope and external development, or a course on accessibility in games. My portfolio and CV are at **sabri-mohamadi.fr**, and I would be glad to share syllabi. I live in Tokyo on a working holiday visa, so I am already authorised to work in Japan.

Kind regards,

Sabri Mohamadi
