Tokyo Coding Club team

October 2026

Application: Part-time Tech Instructor

Games are how I teach code. In my classes at Ynov Campus, a prototype that students can play does more than any slide about loops, and I would love to use Minecraft, Roblox and Scratch the same way with your students.

As a Visiting Lecturer, I teach **Game Design, Level Design, Producing and programming fundamentals** at Ynov Campus as a Visiting Lecturer, from first-year Bachelor's to Master's students. Before that, I created a programming basics course on Udemy and a YouTube channel, Hika Learn, and trained client teams on Microsoft 365 tools.

I trained as a programmer (C#, C++, Unity, Unreal) and worked in the games industry as Global Associate Producer on Little Nightmares at Bandai Namco Entertainment Europe. Games are the best way I know to get young people excited about code, and I would enjoy learning Minecraft, Roblox and Scratch workflows to build fun, project-based lessons.

I live in Tokyo on a working holiday visa, so I am already authorised to work in Japan. English is my working language, French my native language, and I understand most spoken Japanese. My portfolio is at **sabri-mohamadi.fr**. I would be glad to run a trial lesson.

Kind regards,

Sabri Mohamadi
